World Heart Day, 2022.

World Heart Day is celebrated every year on **29 September**. In May 2012, world leaders committed to reducing global mortality from non-communicable diseases (NCDs) by 25% by 2025. Cardiovascular disease (CVD) is accountable for nearly half of all NCD deaths making it the world's number one killer

With the view our college and Department of microbiology have arranging the heart exhibition in which we deliberately explain the protection measures of heart diseases with diet and exercise .

World Heart Day is an opportunity for everyone to stop and consider how best to use heart for humanity, for nature, and for you. Beating cardiovascular disease (CVD) is something that matters to every beating heart.

Use Heart means to think differently. To make the right decisions. To act with courage. To help others. To engage with this important cause. The heart is the only organ you can hear and feel. It is the first and last sign of life. It is one of the few things with the potential to unite all of us as people.

For Every Heart involves the use of "FOR" and swings the focus from the actions themselves to the beneficiaries of the actions, allowing for wider application of the campaign while also making it more personal. We want World Heart Day messages to reach as many individuals as possible to help achieve cardiovascular health for every heart. All students, nearby peoples and heart patients were visited the exhibition and we have trying best to make awareness in them about Heart.
